

DESIGN SYSTEMS, INC.

Specializing in Manufacturing Process Design & Integration

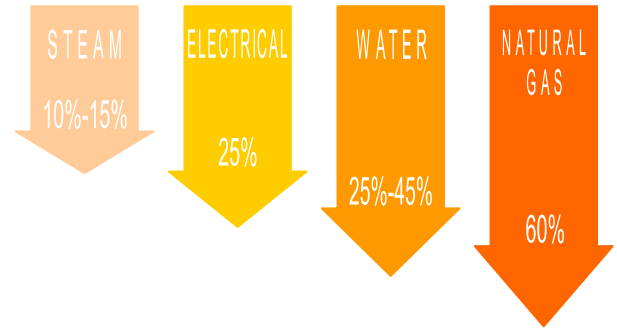

Energy and Utility Management

DSI has the experience in Energy & Utility Management throughout industrial and commercial applications to bring value added solutions and Energy Reduction to your facility through:

- Design and Engineering
- Specification Generation
- Implementation and Program Management
- Commissioning and Launch
- Total Turn Key Solutions

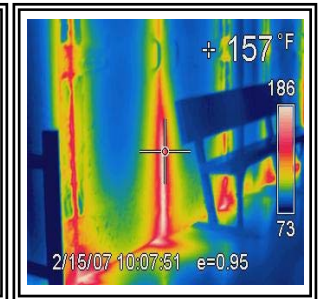

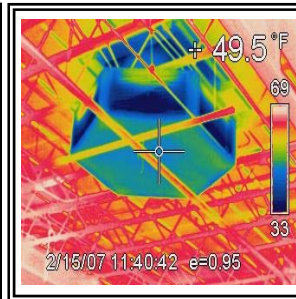

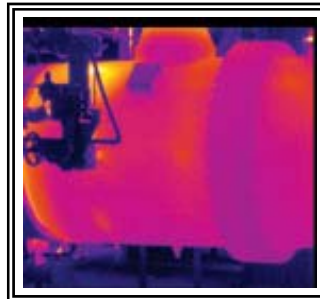

Energy Reductions

Utility Related Cost Containment

- Chilled and Hot Water
- Compressed Air
- Electrical
- Natural Gas
- Potable and Process Water
- Steam
- HVAC

Identify Losses Through Our Infrared Technology

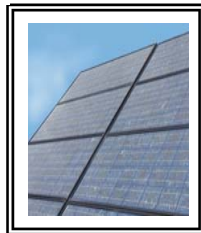

Renewable Energy Systems

Wind Generators

Solar PV

Hot Water Generation

“BOTTOM-LINE” RESULTS:

- Reduces Energy Consumption
- Improve Energy Efficiency
- Increase Productivity
- Enhances “ROI”
- Saves Money
